

Attribute	Details
Material Specs	Welded structural steel frame with ventilated wire-mesh decking to prevent acid pooling
Standard Dimensions	96" L (8-foot) double-sided island; fully adjustable shelf heights
Load Capacity	~4,000 lbs total capacity / ~750 lbs per shelf (safely holds 96–112 batteries)
Layout & Mobility	Caster-mounted mobile island paired with a stationary pegboard endcap
Automated Stock Rotation	Angled gravity-fed shelves automate FIFO (First-In, First-Out) stock rotation
Ergonomic Design	Forward-sloping design reduces ergonomic lifting strain for heavy batteries
Accessory Display	Pegboard endcap easily displays hanging accessories like jumper cables
Tool-Less Adjustment	Slotted uprights allow fast, tool-less shelf height adjustments for different battery sizes
