

Warehouse Storage Rack with 3-Side Mesh Protection

Carrying Capacity	Up to 1500 Kgs
Dimensions	mm
Height	2400
Width	1200
Depth	600

Features	Specification
Name	Warehouse Storage Rack with 3-Side Mesh Protection
Structure	Heavy-duty frame made from mild steel (MS), powder coated for durability - Three sides fitted with steel welded mesh panels for item security and airflow
Shelves	5 adjustable steel shelves per unit - Each shelf supported with cross beams and fitted with mesh for anti-fall protection and ventilation
Access	Open front for fast picking - Back and sides meshed for secure storage, item visibility, and improved safety
Colour	Powder-coated (light blue or custom color as required) - Corrosion and impact resistant
Safety Features	All edges and corners deburred for operator safety - Mesh sides prevent items from falling sideways - Stable frame design for tall stacks
Additional Features	Adjustable shelves for varied SKU sizes - Modular design for easy expansion or relocation - Can be anchored to floor or used as stand-alone unit
Unique Features	Ideal for e-commerce, logistics, and industrial warehouses - QR code and label holders fitted for digital inventory tracking - Allows airflow and sprinkler access for fire safety - Custom mesh sizes and heights available
